NUED 816: RESEARCH METHODOLOGY II

STREAMS:

TIME: 3 HOURS

DAY/DATE:THURSDAY 04/11/2021

8.30 A.M – 11.30 A.M

INSTRUCTIONS:

All questions are compulsory

1. You are the principal Investigator; you want to undertake a scientific research in newly identified problem in Tharaka Nithi County. You are requested to develop a proposal for the study. Discuss the steps you would consider in doing this. (20 marks)
 2. Describe the major ethical issues addressed in many researches involving human subjects conducted in Kenya (20 marks)
 3. Scientific observation involves systematic selection, observation and recording of behaviour, events and settings relevant to the problem under investigation. Discuss the strength and limitation of observation method of data collection and techniques one would use to collect data using observation in a multi- cultural setting like Kenya (20marks)
 4. While writing a research proposal, you are supposed to review literature. Describe the main steps followed in carrying literature review. (20 marks)
 5. Discuss any four components of a research proposal (20 marks)
